## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-15, drawn to an integrated circuit, classified in class 257, subclass 470.
- II. Claims 16-19, drawn to a method for determining a hot area of an integrated circuit, classified in class 165, subclass 253.
- III. Claims 20-21, drawn to a computer program product for determining a hot area of an integrated circuit, classified in class 219, subclass 448.12.

The inventions are distinct, each from the other because of the following reasons:

Claims 16 and 20 link(s) inventions II and III. The restriction requirement among the linked inventions is subject to the nonallowance of the linking claim(s), claims 16-20. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable.
